

Mr Shashank S

Date of birth: 04/03/2003 **Nationality:** Indian **Address:** 577436, India **Phone number:** +91 8050396203
Email address: shashanksbhat03@gmail.com **Web:** <http://www.linkedin.com/in/shashank-s-a453a521b>

Profile

Experienced software engineer and data analyst with a Bachelor's in Computer Science. Expertise in neural networks, Python, MERN stack, Spring Boot, WordPress, and Core Java. Skilled in full-stack development, database management, and product development using tools like SharePoint, iOS, Android, React, Node JS, RESTful APIs, and .NET. Strong focus on Agile methodologies, software testing, and creating scalable solutions. Excellent communicator, committed to staying current with emerging technologies and delivering cutting-edge products.

Experience

Java developer Intern

Q Spiders

 02/2023 – 09/2024  BENGALURU, INDIA

During my 0.6 years at Q Spiders, I rapidly acquired skills in a fast-paced environment, significantly contributing to both personal and company growth.

- **System Performance:** Developed robust Java and Django infrastructure, enhancing user interface functionality and system performance by 20%. Conducted thorough testing and code reviews for quality assurance.
- **Database Management:** Executed advanced SQL queries, reducing system downtime by 50% through effective troubleshooting and data manipulation.
- **Collaboration and Optimization:** Worked with senior developers to optimize SQL queries, improving database efficiency and response times by 30%.
- **Project Development:** Built and launched applications, demonstrating acquired skills and achieving a 90% satisfaction rate from stakeholders by managing problem-resolution initiatives effectively.

Development team lead

Validify

 08/2023 – 03/2024  MANGALURU, INDIA

I played a key role in this project, leading a team of 4 and overseeing project management.

- **Team Leadership:** Led the team in developing a form application and web service for detecting fake product identities using blockchain, completing the project 20% ahead of schedule.
- **Technological Implementation:** Integrated QR code technology to streamline user interaction, improving the user experience by 30% and automating the detection process to reduce manual intervention.
- **Security and Technology:** Used blockchain to secure user identity records, achieving a 99% security compliance rate. Employed Next JS, Python, Solidity, and tools like Blockchain and Hard Hat, enhancing system robustness and maintainability by 30%.

Full stack developer

Android attendance system application

 11/2022 – 09/2023  MANGALURU, INDIA

I had the excellent opportunity to formulate an Android application using the Android Studio development environment:

- **Application Development:** Developed and maintained responsive Android mobile applications, enhancing user experience and event functionality by 30%. Utilized APIs for seamless integration with back-end systems.
- **Code Quality and Best Practices:** Performed code reviews and implemented best practices, ensuring high-quality, scalable, and maintainable code.
- **Performance Optimization:** Maximized application performance by optimizing server-side and client-side code. This resulted in faster load times and a 25% increase in user engagement.

Full stack developer

Resto

 11/2023 – 06/2024  BENGALURU, INDIA

I played a major role in the development of this restaurant application, taking on the responsibility of guiding a dynamic team of developers to success, including overseeing project management.

Experience

- **Dedication:** Successful in creating a responsive restaurant application using HTML, CSS, and JavaScript for the front end, and Node.js for the backend. My dedication contributed to the project being completed 25% ahead of schedule.
- **User Experience and Design:** Designed and implemented a user-friendly interface that allows customers to browse menus, place orders, and make reservations online. The intuitive design improved user engagement by 35% and ensured accessibility for all users.
- **Technologies and Tools:** Utilized Node.js to build RESTful APIs for efficient data handling and server-side logic. Employed a database management system for storing user information, order history, and menu details, which streamlined restaurant operations and increased efficiency by 30%.

Education

Computer Science | BE
Canara Engineering College
📅 12/2020 - 05/2024 📍 MANGALURU, INDIA
CGPA: 8.4

Science | PUC
Government PU College
📅 05/2018 - 08/2020 📍 AMRUTHA, INDIA
Percentage: 84.66

Social Studies | SSLC
National high school
📅 05/2016 - 03/2018 📍 KONANDURU, INDIA
Percentage: 93.44

Skills

ⓘ SOFTWARE SKILLS

Proficient in languages like Java, Python

Efficient in C, C++

Skillful in React JS, Next JS

Trained in tools like PostgreSQL, Express, Hard Hat
